

Term	Definition	Meraki Context	Source/Brand	Category
3D Collagen Matrix	Three molecular weight collagen complex: macro (300,000 daltons), medium (2,000 daltons), micro (400 daltons) for multi-depth delivery	Penetrates multiple skin layers simultaneously	Natura Bissé	Active Complex
3D Photo Analysis	Advanced multi-angle imaging for assessing facial volume, lift, and skin quality changes	Objective EMFACE clinical validation tool	BTL	Clinical Assessment
500mW Power Output	Medical-grade power delivering therapeutic effects with at-home safety profile	Differentiates from lower-powered LED devices	LYMA	Technical Spec
808nm Wavelength	Near-infrared wavelength optimal for penetrating skin layers and stimulating cellular regeneration	Specific therapeutic wavelength in LYMA system	LYMA	Technical Spec
Acetyl Hexapeptide-8 (Argireline)	Six amino acid peptide inhibiting SNARE complex for reduced muscle contraction (topical botox alternative)	Expression line-smoothing peptide	Industry Standard	Active Ingredient
Acetyl Octapeptide-3	Peptide reducing muscle contraction depth to soften expression lines (topical neuromodulator)	Found in Dermabuilder™ booster	HydraFacial	Active Ingredient
Acid Mantle	Slightly acidic (pH 4.5-5.5) film on skin surface from sebum and sweat protecting against microbes	Protective pH barrier	Industry Standard	Physiology
Acne Vulgaris	Multifactorial inflammatory condition involving excess sebum, C. acnes bacteria, inflammation, and keratinization	Requires comprehensive treatment approach	Industry Standard	Skin Condition
Active Delivery Mantle	Peel-off mask (60ml + water) creating smooth film for 20-minute treatment	Signature mask allowing hand/arm massage during processing	Seed to Skin	Peel-Off Mask
Adapalene	Synthetic retinoid (third-generation) binding to specific RAR receptors for acne treatment with less irritation	Available OTC at 0.1%, prescription at 0.3%	Industry Standard	Active Ingredient
Adenosine	Nucleoside improving microcirculation and stimulating collagen synthesis for anti-aging	K-beauty anti-aging staple	Industry Standard	Active Ingredient
Advanced Professional Peels Gentle Glyco Peel	Exfoliating solution with glycolic acid and alpha-hydroxy complex (citric/tartaric/malic/lactic), salicylic acid	Gentle professional chemical peel	Natura Bissé	Professional Product
Advanced Professional Peels Glyco 3 Peel	3-phase system: G3P triple exfoliant, G3P carbonated powder (tartaric/carbonic acid), G3P botanical activator (aloe/botanicals/allantoin)	Multi-phase professional peel system	Natura Bissé	Professional Product
Advanced Professional Peels Radiance Lifting Peel	Multiactive peel with pyruvic/shikimic/lactic acid plus brightening booster with lactic acid/arginine	Professional lifting and brightening peel	Natura Bissé	Professional Product
Age Reversal	Molecular-level intervention to prevent and reverse visible biological aging changes	Goal of Super Anti-Aging Dual Serum	Dr. Barbara Sturm	Scientific Concept
Airless Pump	Packaging preventing air exposure protecting sensitive ingredients from oxidation	Protective packaging	Industry Standard	Packaging Technology
Alastin™ TriHex-Pro	Tri-Hex™ technology, acetyl hexapeptide-38, tremella fuciformis rejuvenating booster	Targets crepiness and volume loss	HydraFacial	Treatment Booster
Alexandrite Laser	755nm laser for hair removal and pigmented lesion treatment	Hair removal gold standard	Industry Standard	Treatment
Allantoin	Botanical extract (from comfrey) with keratolytic and wound-healing properties	Soothing and smoothing ingredient	Industry Standard	Active Ingredient
Allergic Contact Dermatitis	Type IV hypersensitivity reaction from allergen exposure (fragrance, nickel, preservative)	Adverse reaction type	Industry Standard	Clinical Concept
Aloe Vera Gel	90% pure organic aloe leaf juice (IASC/USDA certified) with purslane and panthenol for soothing and hydration	Post-sun, post-waxing, post-epilation treatment	Dr. Barbara Sturm	Soothing Treatment
Alpha Arbutin	Tyrosinase inhibitor for brightening and dark spot reduction without hydroquinone	Key ingredient in Britenol™ booster	HydraFacial	Active Ingredient
Alpha Lipoic Acid	Universal antioxidant (water and fat-soluble) regenerating other antioxidants and reducing glycation	Master antioxidant	Industry Standard	Active Ingredient
Aminoessence Cocktail	Amino acid blend for firmness, suppleness, and skin elasticity	Featured in Essential Shock products	Natura Bissé	Active Complex
Anhydrous Formulation	Waterless product (oils, balms, butters) with extended shelf life and concentrated actives	Water-free formulation	Industry Standard	Formulation Type
Anti-Aging Body Cream	Silky body moisturizer with purslane, elderberry blossom, white almond extract, glacier water for firming	Body extension of facial anti-aging philosophy	Dr. Barbara Sturm	Body Care
Anti-Aging Body Serum	Intensive body serum with concentrated actives for body skin anti-aging	Body treatment serum	Dr. Barbara Sturm	Body Care
Anti-Inflammatory Skincare	Dr. Sturm's core approach using ingredients that combat inflammation as primary anti-aging strategy	All formulations built on inflammation management	Dr. Barbara Sturm	Brand Philosophy
Antiox-Complex 20%	Concentrated antioxidant blend at 20% strength for professional treatments	Featured in C+C Ascorbic Acid Concentrate	Natura Bissé	Active Complex

Antioxidant Synergy	Combination of multiple antioxidants (C+E+ferulic acid) providing enhanced protection	Formulation strategy	Industry Standard	Formulation Concept
Apocrine Gland	Sweat gland in armpits/groin producing protein-rich secretion (body odor when bacteria metabolize)	Scent gland	Industry Standard	Anatomy/Physiology
Aqua Peel	Hydradermabrasion combining vacuum extraction with simultaneous serum infusion	Modern exfoliation technology	Industry Standard	Treatment
Aquaxyl	Moisturizing complex optimizing water flow in skin for sustained hydration	Featured in multiple Natura Bissé products	Natura Bissé	Active Ingredient
Argireline	Hexapeptide-8 reducing neurotransmitter release for expression line softening	Topical botox alternative	Industry Standard	Active Ingredient
Aromatherapy Massage	Swedish massage incorporating essential oils selected for therapeutic benefits (relaxation, energizing, detoxifying)	Holistic sensory massage experience	Industry Standard	Massage Modality
Artemia Salina Extract	Brine shrimp extract for cellular energy and vitality boost	Featured in Diamond Experience Nectar	Natura Bissé	Active Ingredient
Ascorbyl Tetraisopalmitate	Stable oil-soluble vitamin C derivative with enhanced penetration	Lipid-loving vitamin C form	Industry Standard	Active Ingredient
Asiaticoside	Glycosidic form of asiatic acid from Centella asiatica for collagen synthesis and scar reduction	Centella active compound	Industry Standard	Active Ingredient
Azelaic Acid	Dicarboxylic acid from grains; antibacterial, anti-inflammatory, and tyrosinase-inhibiting properties	Excellent for acne, rosacea, and hyperpigmentation	Industry Standard	Active Ingredient
Bakuchiol	Plant-based retinol alternative providing anti-aging benefits without irritation	Retinol substitute in Dr Dennis Gross booster	HydraFacial	Active Ingredient
Baumann Skin Type	16-type classification system based on four parameters: oily vs dry, sensitive vs resistant, pigmented vs non-pigmented, wrinkled vs tight	Comprehensive skin typing system	Industry Standard	Assessment Tool
BB Glow Treatment	Semi-permanent foundation technique using microneedling to deposit pigmented serum into skin	Korean beauty treatment	Industry Standard	Treatment
BBL (BroadBand Light)	Advanced IPL with precise wavelength control for superior pigment and vessel treatment	Next-generation photorejuvenation	Industry Standard	Treatment
Bear Walking	Grounding touch technique traveling feet-to-head (opening) or head-to-feet (closing)	Establishes energetic connection at treatment start/end	Seed to Skin	Massage Technique
Beta-Glucan	Polysaccharide for immune support, hydration, and soothing reactive skin	Key ingredient in NassifMD® Hydraglucan	HydraFacial	Active Ingredient
Betaine	Amino acid derivative (from sugar beets) with humectant and osmoprotectant properties	Hydrating and barrier-supporting	Industry Standard	Active Ingredient
Bioengineered Growth Factors	Laboratory-created proteins mimicking natural growth factors for cellular regeneration and collagen stimulation	Key ingredient in ReGen GF™+ booster	HydraFacial	Active Ingredient
Biomimetic Polypeptides	Lab-created peptides mimicking natural skin peptides to enhance regeneration and collagen/elastin/HA production	Featured in Super Anti-Aging formulations	Dr. Barbara Sturm	Active Ingredient
Bisabolol (Alpha-Bisabolol)	Chamomile-derived compound with anti-inflammatory and skin-soothing properties	Gentle calming ingredient	Industry Standard	Active Ingredient
Bistorta Root Extract	Polygonum bistorta root improving radiance, texture, and fine line appearance	Glow Drops signature ingredient	Dr. Barbara Sturm	Active Ingredient
Blood Facial (Vampire Facial)	PRP (Platelet-Rich Plasma) facial created by Dr. Sturm in 2002 using body's own healing factors	First PRP facial; foundation of regenerative aesthetics	Dr. Barbara Sturm	Treatment Protocol
Body Scrub (Polish)	Exfoliating treatment using abrasive substances (salt, sugar, coffee) to remove dead skin cells	Body exfoliation treatment	Industry Standard	Body Treatment
Body Wrap	Treatment applying therapeutic substances (seaweed, mud, clay) with thermal wrap for detoxification or hydration	Occlusive body treatment	Industry Standard	Body Treatment
Boots Star Rating	UK/European UVA protection system: 3 stars minimum, 5 stars (UVA/UVB ratio >90%)	Alternative UVA rating	Industry Standard	Measurement
Boswellia Serrata Extract	Frankincense extract with anti-inflammatory and skin-soothing properties	Featured in Inhibit line products	Natura Bissé	Active Ingredient
Bright Eco-Botanical Complex	Plant-based brightening blend for natural luminosity enhancement	Featured in Diamond Luminous formulations	Natura Bissé	Active Complex
Buccal Facial Massage	Intraoral massage working muscles from inside mouth for facial sculpting and lifting	Advanced contouring technique	Industry Standard	Massage Technique
Buccal Massage	Intraoral massage technique working facial muscles from inside the mouth for deep sculpting	Advanced facial contouring technique	Industry Standard	Massage Technique
C+C Vitamin Ascorbic Acid Concentrate	Professional concentrate with 20% Antiox-Complex and 12% pure vitamin C for intensive brightening	In-treatment strength vitamin C	Natura Bissé	Professional Product
C+C Vitamin Ascorbic Facial Mask	Antioxidant mask providing vitamin C benefits with hydration and firming effects	At-home or in-treatment vitamin C mask	Natura Bissé	Mask

C+C Vitamin Body Cream	Firming body cream with orange extract and magnesium ascorbyl phosphate for brightening	Body extension of C+C line	Natura Bissé	Body Care
C+C Vitamin Cream	Stabilized ascorbic acid cream with vitamin C cyclodextrins and natural collagen amino acids	Daily vitamin C moisturizer	Natura Bissé	Moisturizer
C+C Vitamin Essence	Aromatic revitalizing oil with hazelnut, grapeseed oil, and essential oils	Nourishing vitamin C oil treatment	Natura Bissé	Facial Oil
C+C Vitamin Souffle Mask	Lightweight mask with ascorbic acid cyclodextrins, shea butter, Hydro-24 Complex	Whipped texture vitamin C mask	Natura Bissé	Mask
C+C Vitamin Splash	Citric revitalizing spray with natural wheat/birch sugar and bitter orange extract	Refreshing vitamin C mist	Natura Bissé	Mist
Calming Serum	Purslane, aloe vera, and cardiospermum for soothing reactive, sensitive skin and reducing redness	For irritated or inflamed skin	Dr. Barbara Sturm	Serum
Cannabidiol (CBD)	Non-psychoactive cannabis compound with anti-inflammatory and sebum-regulating properties	Trending wellness ingredient	Industry Standard	Active Ingredient
Cavitation	Ultrasound waves creating microbubbles for fat cell disruption and body contouring	Non-invasive fat reduction	Industry Standard	Body Treatment
Ceramides	Lipid molecules (sphingolipids) comprising 50% of skin barrier; essential for water retention and protection	Barrier repair essential	Industry Standard	Active Ingredient
Chelating Agent	Ingredient (EDTA, phytic acid) binding metal ions improving stability and preventing oxidation	Stability-enhancing ingredient	Industry Standard	Ingredient Category
Chemical Peel	Controlled chemical exfoliation using acids (AHA, BHA, TCA) to remove damaged outer layers and stimulate regeneration	Professional resurfacing treatment	Industry Standard	Treatment Technique
Cholesterol	Lipid component (25% of barrier) working synergistically with ceramides and fatty acids for optimal barrier	Barrier lipid essential	Industry Standard	Active Ingredient
Chronopeptide	Peptide supporting circadian rhythm regulation for optimized skin repair	Featured in Circadia® boosters	HydraFacial	Active Ingredient
Circadia® Chrono-Peptide	Chronopeptide, volumizing peptide, matrix peptide revitalizing booster	Targets aging and volume loss	HydraFacial	Treatment Booster
Circadia® ProTec Plus	Antioxidant brightening complex, hydrating peptide, fruit complex, HA protective booster	Targets dullness and dark spots	HydraFacial	Treatment Booster
Clean Beauty	Products formulated without controversial ingredients (parabens, sulfates, phthalates, synthetic fragrance)	Movement/marketing term	Industry Standard	Product Category
Coenzyme Q10 (Ubiquinone)	Lipid-soluble antioxidant supporting mitochondrial energy production and reducing oxidative stress	Cellular energy antioxidant	Industry Standard	Active Ingredient
Collagen Induction Therapy (CIT)	Microneedling stimulating wound healing response for collagen and elastin production	Medical-grade skin rejuvenation	Industry Standard	Treatment
Collagen Type I	Most abundant collagen (80-85% of dermal collagen) providing tensile strength	Primary structural protein	Industry Standard	Protein
Collagen Type III	Collagen comprising 10-15% of dermis; abundant in young skin, decreases with aging	Youthful collagen type	Industry Standard	Protein
Comedone Extraction	Manual removal of blackheads (open comedones) and whiteheads (closed comedones) using extractor tool	Professional acne treatment	Industry Standard	Treatment Technique
Consultation	Pre-service assessment evaluating skin concerns, contraindications, goals, and medical history	Essential service component	Industry Standard	Service Protocol
Contraindication	Condition (pregnancy, active infection, certain medications) preventing or modifying service	Safety consideration	Industry Standard	Clinical Concept
Copper Peptides (GHK-Cu)	Copper-binding peptide with wound healing, anti-inflammatory, and collagen-stimulating properties	Regenerative peptide complex	Industry Standard	Active Ingredient
Cosmeceutical	Hybrid cosmetic with pharmaceutical-grade actives providing therapeutic benefits	Medical-grade skincare	Industry Standard	Product Category
CPH-4 Complex	Proprietary brightening complex in Diamond Luminous line	Radiance-enhancing technology	Natura Bissé	Active Complex
Craniosacral Therapy	Gentle manipulation of cranial bones and sacrum to enhance cerebrospinal fluid flow	Subtle osteopathic technique	Industry Standard	Massage Modality
Cruelty-Free	Products not tested on animals (differs from vegan; may contain animal-derived ingredients)	Ethical certification	Industry Standard	Product Category
CryoGlobes	Frozen glass globes for cryotherapy massage reducing inflammation and sealing products	Final step with Midnight Miracle oil	Seed to Skin	Tool

Cryotherapy Facial	Sub-zero temperature treatment (-100°C to -160°C) for pore tightening, inflammation reduction, and collagen stimulation	Extreme cold therapy	Industry Standard	Treatment Technique
Cyclodextrin	Ring-shaped molecule encapsulating actives for improved stability and controlled release	Encapsulation technology	Industry Standard	Formulation Technology
Darker Skin Tones Serum	Specialized serum addressing hyperpigmentation concerns specific to melanin-rich skin	Customized for darker complexions	Dr. Barbara Sturm	Serum
Deep Tissue Massage	Slow, deliberate strokes with deep pressure addressing muscle adhesions and chronic tension patterns	Therapeutic intensive massage	Industry Standard	Massage Modality
Dermaplaning	Manual exfoliation technique using surgical scalpel at 45° angle to remove vellus hair and dead skin cells	Provides immediate glow and enhanced product penetration	Industry Standard	Exfoliation Technique
Dermis	Middle skin layer containing collagen, elastin, blood vessels, nerves, and appendages	Structural skin layer	Industry Standard	Anatomy/Physiology
Desmosomes	Cell junctions linking keratinocytes for structural integrity and barrier function	Cellular adhesion structure	Industry Standard	Cell Biology
Diamond Experience Essence	Rejuvenating cream with pure ursolic acid, vitamin E, vitamin C cyclodextrins, sweet pea extract, lavender	Luxe anti-aging daily cream	Natura Bissé	Moisturizer
Diamond Experience Lavender Neuro-Aroma	Essential oil with neuro-peptides, sensorphine dipeptide acetyl cetyl ester-1, lavender oil, grape seed oil	Aromatherapeutic neuro-cosmetic treatment	Natura Bissé	Aromatherapy/Serum
Diamond Experience Nectar	Energizing concentrate with Artemia Salina extract, oligo-collagen complex, hydrolyzed soy protein, plant prebiotic complex	Revitalizing serum treatment	Natura Bissé	Serum
Diamond Luminous Clarity Toning Lotion	Radiance toner with niacinamide, pomegranate extract, betaine, phytic acid, CPH-4 complex	Brightening toner step	Natura Bissé	Toner
Diamond Luminous Expertise Radiance Veil	Glowing hydrating serum with propolis extract, Ceratonia Siliqua extract, organic aloe vera, sensorphine	Luminosity-boosting serum	Natura Bissé	Serum
Diamond Luminous Perfecting Glowing Mask	Brightening mask with pro-radiance renewing cocktail: prickly pear, alpha-arbutin, bright eco-botanical complex, turmeric	Professional glowing mask treatment	Natura Bissé	Mask
Diamond Luminous Perfecting Serum	Brightening serum with tranexyl spot corrector, bright eco-botanical complex, turmeric, alpha-arbutin, 4-weight HA	Comprehensive brightening treatment serum	Natura Bissé	Serum
Diamond Well-Living Experience Aroma Nectar Detox	Relaxing essence with antioxidant oils: sunflower, rosemary, hazelnut, olive leaf, orange, tangerine, lemon, lavender, sage, cypress	Detoxifying aromatherapy treatment	Natura Bissé	Aromatherapy/Serum
Diode Laser	800-810nm laser for hair removal on all skin types	Versatile hair removal laser	Industry Standard	Treatment
DOCTOR BABOR® Collagen HA	Collagen peptide complex, marine collagen, HA lifting booster	Addresses sagginess and volume loss	HydraFacial	Treatment Booster
Double Cleansing	Two-step cleansing: oil-based cleanser removing makeup/sunscreen followed by water-based cleanser	K-beauty foundational technique	Industry Standard	Treatment Technique
Dr Dennis Gross™ Phyto-Retinol	Retinol + bakuchiol + ferulic acid + rambutan leaf extract for texture and barrier renewal	Targets texture and aging signs	HydraFacial	Treatment Booster
Eccrine Gland	Sweat gland distributed across body producing watery secretion for thermoregulation	Temperature control structure	Industry Standard	Anatomy/Physiology
Ectoin	Extremolyte from halophilic bacteria protecting against UV, pollution, and dehydration stress	Environmental protection ingredient	Industry Standard	Active Ingredient
Effleurage	Long, gliding massage strokes promoting relaxation and circulation	Foundational massage stroke	Industry Standard	Massage Technique
EGF (Epidermal Growth Factor)	Polypeptide signaling protein stimulating cellular proliferation and wound healing	Regenerative bioactive ingredient	Industry Standard	Active Ingredient
Elastin	Protein providing skin elasticity and recoil; degrades with age and UV exposure	Stretch and snap-back protein	Industry Standard	Protein
Elderberry Blossom Extract	Sambucus nigra extract for skin tightening and firming	Key ingredient in Anti-Aging Body Cream	Dr. Barbara Sturm	Active Ingredient
EMFACE	First needle-free, hands-free facial device using Synchronized RF + HIFES to treat skin and muscles simultaneously	Revolutionary non-invasive facial rejuvenation	BTL	Technology/Device
Emollient	Lipid-based ingredient (oils, butters, esters) softening and smoothing skin	Texture-improving ingredient	Industry Standard	Ingredient Category
Emulsifier	Ingredient (lecithin, cetearyl alcohol, stearic acid) binding oil and water phases	Formulation stabilizer	Industry Standard	Formulation Component
Emulsion (O/W vs W/O)	Oil-in-water (light, absorbs quickly) vs water-in-oil (rich, occlusive) formulation types	Product texture determinant	Industry Standard	Formulation Type
Endermologie	Mechanical massage using rollers and suction for cellulite reduction and lymphatic drainage	FDA-cleared cellulite treatment	Industry Standard	Body Treatment
Enzymatic Peel	Gentle exfoliation using proteolytic enzymes (papain, bromelain) to digest dead skin cells without acids	Suitable for sensitive skin types	Industry Standard	Exfoliation Technique

Epicutis™	Activated grape seed extract, chia seed oil, spilanthus acmella, HA moisture-replenishing booster (medical-grade)	For fine lines and dehydration	HydraFacial	Treatment Booster
Epidermis	Outermost skin layer undergoing constant renewal (28-day cycle in healthy skin)	Regenerating skin layer	Industry Standard	Anatomy/Physiology
Epigallocatechin Gallate (EGCG)	Polyphenol from green tea with potent antioxidant and anti-inflammatory properties	Green tea active compound	Industry Standard	Active Ingredient
Epigenetic Technology	Technology influencing gene expression for aging, collagen synthesis, and cellular repair without DNA alteration	LYMA's genetic-level rejuvenation approach	LYMA	Technology
Erbium Laser	Ablative laser (2940nm) with less thermal damage than CO2 for gentler resurfacing	Alternative ablative laser	Industry Standard	Treatment
Ergothioneine	Amino acid antioxidant with superior cellular protection and longevity benefits	Longevity-associated ingredient	Industry Standard	Active Ingredient
Essential Shock Intense 3D Collagen Concentrate	Professional 12-vial treatment with 3D Collagen Matrix (3 molecular weights: 300,000, 2,000, 400 daltons)	In-treatment room use for mature, saggy skin	Natura Bissé	Professional Product
Essential Shock Intense Retinol Eye Concentrate	Anti-defying eye contour with retinol, proteoglycans, matrixyl, brewer's yeast extract, vitamin E	Targets periorbital aging comprehensively	Natura Bissé	Eye Treatment
Exosome Eye Serum	Exosome technology targeting periorbital aging and dark circles	Advanced eye treatment	Dr. Barbara Sturm	Eye Treatment
Exosome Face Serum	Next-generation serum with exosome technology for cellular communication and regeneration	Advanced biotechnology formulation	Dr. Barbara Sturm	Serum
Exosomes	Extracellular vesicles carrying growth factors, cytokines, and genetic material for cellular communication	Next-generation regenerative ingredient	Industry Standard	Active Ingredient
Extracellular Matrix (ECM)	Structural network of proteins (collagen, elastin) and GAGs providing dermal architecture	Skin structural scaffolding	Industry Standard	Anatomy/Physiology
Extrinsic Aging	Environmental aging from UV, pollution, smoking, diet accelerating skin aging	Preventable aging	Industry Standard	Aging Type
Eye Wands	Specialized applicators for gentle periorbital massage and product application	Used with The Eye Rescue Light Time	Seed to Skin	Tool
Facial Acupressure	Traditional Chinese Medicine technique applying pressure to specific meridian points for energetic balance and circulation	Holistic facial treatment approach	Industry Standard	Massage Technique
Facial Cupping	Silicone or glass cups creating negative pressure for lymphatic drainage and facial contouring	Ancient technique modernized for facials	Industry Standard	Massage Technique
Facial Cupping Therapy	Negative pressure cups creating vacuum for lymphatic drainage and facial lifting	Traditional therapy modernized	Industry Standard	Treatment Technique
Facial Lymphatic Drainage	Gentle massage following lymphatic pathways to reduce puffiness and promote detoxification	Depuffing massage technique	Industry Standard	Massage Technique
Fascial Remodeling	Collagen/elastin restructuring in facial fascia increasing tightness, elasticity, and lift	Achieved through combined RF heating and mechanical stress	BTL	Treatment Effect
Ferulic Acid	Plant-based antioxidant stabilizing and boosting vitamin C and E efficacy; photoprotective	Antioxidant booster and stabilizer	Industry Standard	Active Ingredient
Fibroblast	Dermal cell producing collagen, elastin, and hyaluronic acid; key target for anti-aging treatments	Collagen-producing cell	Industry Standard	Cell Biology
Fibroblast Therapy	Plasma pen treatment creating controlled micro-injuries for skin tightening and lifting	Non-surgical skin tightening	Industry Standard	Treatment
Film-Former	Polymer creating protective film on skin surface (PVP, acrylates)	Surface-coating ingredient	Industry Standard	Ingredient Category
Fitzpatrick Scale	Dermatological classification system (Types I-VI) categorizing skin's melanin content and sun sensitivity	Standard for assessing treatment suitability	Industry Standard	Assessment Tool
Flotation Therapy	Sensory deprivation in Epsom salt-saturated water (1000+ lbs salt) for deep relaxation	REST (Restricted Environmental Stimulation Therapy)	Industry Standard	Body Treatment
Forma	Bi-polar radiofrequency with real-time temperature monitoring for controlled dermal heating	Comfortable RF skin tightening	Industry Standard	Treatment
Fractional CO2 Laser	Ablative laser creating microscopic wounds for dramatic skin resurfacing and tightening	Gold standard laser resurfacing	Industry Standard	Treatment
Friction	Deep circular or cross-fiber massage movements breaking adhesions	Deep tissue massage stroke	Industry Standard	Massage Technique
Frontalis Muscle	Forehead muscle responsible for eyebrow elevation; primary EMFACE target	Strengthening creates brow lift and forehead smoothing	BTL	Anatomy
Fullerene C60	Carbon molecule (60 carbon atoms) with exceptional antioxidant and anti-aging properties	Nobel Prize-winning ingredient	Industry Standard	Active Ingredient
FWES Scale	Facial Wrinkle Evaluation Scale for standardized clinical wrinkle severity assessment	Validated 36.6% average wrinkle reduction with EMFACE	BTL	Clinical Assessment

Galvanic Therapy	Direct current (positive and negative poles) for deep product penetration (iontophoresis) and extraction (desincrustation)	Professional electrical facial treatment	Industry Standard	Technology
GHK-Cu (Copper Peptide)	Glycyl-L-histidyl-L-lysine copper complex for wound healing and remodeling	Regenerative copper peptide	Industry Standard	Active Ingredient
Glow Drops	Polygonum bistorta root concentrate providing instant radiance and long-term complexion refinement	Can be mixed with moisturizer or applied alone	Dr. Barbara Sturm	Serum
Glutathione	Master antioxidant supporting detoxification and protecting against oxidative stress	Featured in advanced anti-aging formulas	Dr. Barbara Sturm	Active Ingredient
Glycation	Process where sugars bind proteins (collagen, elastin) creating AGEs (Advanced Glycation End-products)	Sugar-related aging mechanism	Industry Standard	Aging Mechanism
Glycerin (Glycerol)	Humectant drawing moisture from atmosphere and dermis to epidermis; skin-identical component	Classic effective hydrator	Industry Standard	Active Ingredient
Glycolic Acid	Alpha hydroxy acid (AHA) from sugarcane; smallest molecular size (76 Da) for deepest penetration and exfoliation	Most popular AHA for chemical exfoliation	Industry Standard	Active Ingredient
Glycosaminoglycans (GAGs)	Long polysaccharide chains (hyaluronic acid, dermatan sulfate, chondroitin sulfate) binding water in dermis	Water-binding molecules	Industry Standard	Biochemistry
Gommage	French exfoliation technique using enzyme or acid-based cream rolled off skin taking dead cells	Gentle enzymatic exfoliation	Industry Standard	Treatment Technique
GravZero Fusion	Anti-gravity complex targeting sagging and loss of firmness	Phase 2 of Zero Gravity Lift	Natura Bissé	Active Complex
Gua Sha	Traditional Chinese scraping technique using jade/rose quartz tools for fascial release	Performed after Myofascial massage in 90-minute protocols	Seed to Skin	Tool/Technique
Halotherapy (Salt Therapy)	Exposure to microclimate of salt aerosol (sodium chloride particles) for respiratory and skin benefits	Dry salt therapy	Industry Standard	Body Treatment
HIFES (High-Intensity Facial Electromagnetic Stimulation)	Technology for delicate facial muscle supramaximal contraction increasing resting muscle tone 30%	Mechanical component reversing muscle aging	BTL	Technology
High-Frequency Treatment	Alternating current producing ozone for antibacterial, circulation-boosting effects on acne-prone skin	Professional electrical facial treatment	Industry Standard	Technology
Homecare Regimen	Post-service product recommendations extending treatment results at home	Aftercare protocol	Industry Standard	Service Protocol
Hot Stone Massage	Heated basalt stones (130-145°F) placed on body and used as massage tools for deep muscle relaxation	Thermotherapy massage modality	Industry Standard	Massage Modality
Humectant	Hygroscopic ingredient (glycerin, HA, propylene glycol) drawing moisture to skin	Hydration ingredient type	Industry Standard	Ingredient Category
Hyaluronic Acid	Multi-molecular-weight HA (low, medium, high) for multi-level hydration and immediate plumping	Featured in multiple formulations	Dr. Barbara Sturm	Active Ingredient
Hyaluronic Serum	Multi-weight hyaluronic acid serum (long-chain and short-chain) for intensive hydration and plumping	Core hydration step in SturmGlow routine	Dr. Barbara Sturm	Serum
Hydrafacial Britenol™	Vitamin C, alpha arbutin, antioxidants, HA tone-evening booster	Targets uneven tone and hyperpigmentation	HydraFacial	Treatment Booster
Hydrafacial Dermabuilder™	Tripeptide-1, acetyl octapeptide-3 firming booster for expression line softening	Addresses sagginess and wrinkles	HydraFacial	Treatment Booster
Hydrafacial Hydralock HA	Triple HA complex + vitamin B5 + fruit extracts for hydration, plumping, wrinkle reduction	Targets dehydration and dryness	HydraFacial	Treatment Booster
Hydrafacial ReGen GF™+	Bioengineered growth factors + vegan collagen booster for hydration and natural collagen/elastin support	Targets dehydration, fine lines, aging	HydraFacial	Treatment Booster
Hydro-24 Complex	24-hour hydration system maintaining moisture throughout the day	Featured in various Natura Bissé formulations	Natura Bissé	Active Complex
Hydrolyzed Hyaluronic Acid	Fragmented HA with very small molecular size (3-10 kDa) for enhanced penetration	Deepest-penetrating HA form	Industry Standard	Active Ingredient
Hydrotherapy	Therapeutic use of water (baths, showers, steam) at various temperatures for health benefits	Water-based therapy	Industry Standard	Body Treatment
Hyperpigmentation	Excess melanin production causing dark patches; includes melasma, post-inflammatory hyperpigmentation (PIH), sunspots	Common concern addressed in brightening treatments	Industry Standard	Skin Condition
Hypodermis (Subcutis)	Deepest skin layer composed primarily of adipose tissue for insulation and padding	Fat storage layer	Industry Standard	Anatomy/Physiology
Idebenone	Synthetic antioxidant more potent than CoQ10, protecting against environmental damage	Powerful antioxidant	Industry Standard	Active Ingredient
Informed Consent	Written agreement documenting client understanding of treatment risks, benefits, and alternatives	Legal protection document	Industry Standard	Legal Requirement

Infrared Sauna	Sauna using infrared heaters (120-140°F) for direct body heating without extreme ambient heat	Modern sauna technology	Industry Standard	Body Treatment
Inhibit High Definition Gel-Mask with Hyaluronic Acid	Smoothing hydrating mask with HA, aquaxyl, Boswellia Serrata extract, panthenol	Plumping and smoothing mask treatment	Natura Bissé	Mask
Inhibit Zero Gravity Lift Concentrate	3-phase lifting treatment: Phase 1 Relax & Reform (Octamioxyl®), Phase 2 Hydrate & Fill (GravZero Fusion/HA/retinol), Phase 3 Firm & Lift (Phyto-Lift/collagen)	Advanced multi-phase lifting treatment	Natura Bissé	Professional Product
Intrinsic Aging	Genetically determined aging process (decreased collagen, thinner skin, slower turnover)	Natural chronological aging	Industry Standard	Aging Type
IPL (Intense Pulsed Light)	Broad-spectrum light (500-1200nm) targeting pigment and blood vessels for photorejuvenation	Multi-concern light treatment	Industry Standard	Treatment
Irritant Contact Dermatitis	Non-allergic inflammatory reaction from direct chemical irritation	Adverse reaction type	Industry Standard	Clinical Concept
Jade Combs	Jade scalp massage tools for circulation stimulation during mask processing	Used during Black Magic 15-minute application	Seed to Skin	Tool
Jade Rollers	Dual-sized jade tools (large face roller, small eye roller) for lymphatic drainage	Final step with moisturizer or oil	Seed to Skin	Tool
Jet Peel	High-pressure oxygen and saline jet for exfoliation and deep product delivery	Non-invasive exfoliation technology	Industry Standard	Treatment
JLO Beauty®	Olive leaf extract, hydracomplex, fermented adaptogen blend, niacinamide brightening booster	Addresses dullness and uneven tone	HydraFacial	Treatment Booster
Keratinocyte	Primary epidermal cell producing keratin for barrier protection	Structural skin cell	Industry Standard	Cell Biology
Keratosis Pilaris	Genetic condition causing rough bumps (keratin plugs) on arms, thighs, buttocks, and face	Requires consistent exfoliation and hydration	Industry Standard	Skin Condition
Kobido Massage	Traditional Japanese lifting massage technique combining 47 movements for facial rejuvenation	Ancient art of facial sculpting	Industry Standard	Massage Technique
Kojic Acid	Fungal byproduct inhibiting tyrosinase for melanin reduction; unstable, often used with stabilizers	Brightening agent for hyperpigmentation	Industry Standard	Active Ingredient
Lactic Acid	Alpha hydroxy acid (AHA) from milk; gentler than glycolic with additional hydrating properties	Suitable for sensitive skin	Industry Standard	Active Ingredient
Lamellar Bodies	Organelles in keratinocytes secreting lipids (ceramides, cholesterol, fatty acids) to form barrier	Lipid-producing structures	Industry Standard	Cell Biology
Langerhans Cell	Immune cell in epidermis detecting pathogens and coordinating immune response	Skin immune surveillance	Industry Standard	Cell Biology
Laser Genesis	Non-ablative 1064nm Nd:YAG laser for collagen stimulation and diffuse redness reduction	Gentle heat-based rejuvenation	Industry Standard	Treatment
LED Light Therapy	Phototherapy using specific wavelengths (red 630-700nm anti-aging, blue 400-470nm acne, yellow 570nm redness) for cellular stimulation	Non-thermal light-based skin treatment	Industry Standard	Technology
Lifting Serum	Peptide-powered serum for visible lifting and firming without invasive procedures	Non-invasive lifting solution	Dr. Barbara Sturm	Serum
Lingonberry Fruit Extract	Nordic berry extract rich in antioxidants for sun protection and anti-aging	Featured in Sun Cream Body SPF 30	Dr. Barbara Sturm	Active Ingredient
Linoleic Acid	Essential omega-6 fatty acid often deficient in acne-prone skin; anti-inflammatory and barrier-supporting	Acne-beneficial essential fatty acid	Industry Standard	Active Ingredient
Liposomal Delivery	Phospholipid vesicles encapsulating actives for enhanced penetration and stability	Advanced delivery system	Industry Standard	Formulation Technology
Living Water	Structured water with enhanced bioavailability for improved cellular hydration	Featured in Natura Bissé Glyco 3 Peel	Natura Bissé	Base Ingredient
LLLT (Low-Level Laser Therapy)	Non-thermal laser therapy stimulating cellular activity, collagen, and ATP synthesis without tissue damage	Science behind LYMA Laser treatments	LYMA	Technology
Lumiyouth Complex	Anti-aging brightening complex with niacinamide, carnosine, crystal illuminating peptide	Featured in Diamond Luminous Perfecting Serum	Natura Bissé	Active Complex
LYMA Laser	Low-Level Laser Therapy device (500mW, 808nm) for clinic-grade cellular rejuvenation	First at-home/professional aesthetic laser system	LYMA	Technology/Device
LYMA Supplement	8-ingredient bioavailable supplement formulated by Professor Paul Clayton	Complementary oral support for skin health	LYMA	Wellness Product
Lymphatic Drainage Massage	15-30 minute gentle massage following lymphatic pathways for detoxification	Core technique in Purifying facial	Seed to Skin	Massage Technique
Madecassoside	Triterpenoid from Centella asiatica with superior anti-inflammatory and wound-healing properties	Advanced centella derivative	Industry Standard	Active Ingredient

Magnesium Ascorbyl Phosphate	Stable vitamin C derivative (water-soluble) converting to ascorbic acid in skin	Gentler vitamin C alternative	Industry Standard	Active Ingredient
Mandelic Acid	Alpha hydroxy acid (AHA) from bitter almonds; larger molecule (152 Da) for gentler, antibacterial exfoliation	Excellent for acne-prone and sensitive skin	Industry Standard	Active Ingredient
Matrixyl	Peptide complex stimulating collagen and elastin synthesis for wrinkle reduction	Featured in Natura Bissé eye treatments	Natura Bissé	Active Ingredient
Matrixyl 3000	Palmitoyl tripeptide-1 and palmitoyl tetrapeptide-7 combination stimulating collagen and elastin	Peptide powerhouse	Industry Standard	Active Ingredient
MC1 Cream	Dr. Sturm's original blood plasma-based cream created in 2002; first doctor-issued PRP skincare	Historical foundation of the brand	Dr. Barbara Sturm	Historical Product
MED (Minimal Erythema Dose)	Lowest UV dose causing visible redness 24 hours post-exposure; used to determine SPF	UV sensitivity measurement	Industry Standard	Measurement
Melanocyte	Pigment-producing cell synthesizing melanin in response to UV exposure	Pigmentation cell	Industry Standard	Cell Biology
Melasma	Hormone-influenced hyperpigmentation appearing as brown/gray patches typically on face (forehead, cheeks, upper lip)	Challenging to treat; requires consistent management	Industry Standard	Skin Condition
Mesotherapy	Intradermal micro-injections delivering vitamins, minerals, amino acids directly to skin	Injectable skin rejuvenation	Industry Standard	Treatment
Microcurrent Therapy	Low-level electrical current mimicking body's bioelectrical field to tone facial muscles and stimulate ATP production	Non-invasive facial toning technology	Industry Standard	Treatment Technique
Microneedling	Controlled micro-injury technique using fine needles (0.5-2.5mm depth) to stimulate collagen induction therapy	Professional-only collagen-stimulating treatment	Industry Standard	Treatment Technique
Microneedling with PRP	Combination treatment using microneedling channels for enhanced PRP (platelet-rich plasma) delivery	Advanced regenerative facial	Industry Standard	Treatment
Micronized Algae Powder	Resculpting/hydrating face mask powder with algae, silica, kaolin clay	Professional mask treatment	Natura Bissé	Professional Product
Milia	Small white keratin-filled cysts appearing around eyes and cheeks; primary (spontaneous) or secondary (post-trauma)	Requires professional extraction	Industry Standard	Skin Condition
Molecular Cosmetics	Dr. Sturm's advanced ingredient science prioritizing skin matrix/barrier protection, nutrition, hydration, and anti-inflammation	25 years scientific research foundation	Dr. Barbara Sturm	Brand Philosophy
Murad® Clarifying	Glycolic acid, salicylic acid, ginger root, witch hazel booster for pore decongestion	Addresses oiliness, congestion, blemishes	HydraFacial	Treatment Booster
Murad® Retinol	Retinol tri-active technology, micronized collagen peptides, glycolic acid smoothing booster	Addresses fine lines, wrinkles, texture	HydraFacial	Treatment Booster
Murad® Vita-C	Vitamin C, glycolic acid, tranexamic acid, RepleniCell™ brightening booster	Targets dullness and uneven tone	HydraFacial	Treatment Booster
Musculoaponeurotic System	Facial connective tissue network linking skin, fascia, and muscles targeted by EMFACE	Key anatomical structure for comprehensive rejuvenation	BTL	Anatomy
Myofascial Face Massage	30-35 minute deep tissue facial massage addressing fascia and muscle tension	Core technique in Reverse Signature and Bespoke facials	Seed to Skin	Massage Technique
Myofascial Release	Gentle sustained pressure releasing restrictions in fascial network for improved mobility	Fascial therapy technique	Industry Standard	Massage Modality
Myofibril Renewal	Process of muscle fiber regeneration and strengthening at cellular level	Mechanism behind EMFACE muscle tone improvement	BTL	Physiological Process
Myristoyl Pentapeptide-17	Keratin-stimulating peptide for eyelash and eyebrow growth	Lash-enhancing peptide	Industry Standard	Active Ingredient
Nano Needling	Superficial needling (0.15-0.25mm) for enhanced product penetration without creating channels	Gentle needling alternative	Industry Standard	Treatment
Nanotechnology	Particle size manipulation (<100nm) for enhanced penetration and efficacy	Miniaturization technology	Industry Standard	Formulation Technology
NassifMD® Hydraglucan™	Hyaluronic acid, beta-glucan, glucosamine, marine botanicals hydration booster	Addresses dehydration	HydraFacial	Treatment Booster
Natural Moisturizing Factor (NMF)	Mix of hygroscopic substances (amino acids, PCA, urea, lactic acid) in stratum corneum attracting water	Skin's natural hydration system	Industry Standard	Biochemistry
NB-Ceutical Tolerance Enzyme Peel	Enzymatic peel with prickly pear, papaya extract, chamomile, salicylic acid, lactic acid, glycosides, allantoin	Gentle enzymatic professional peel	Natura Bissé	Professional Product
Nd:YAG Laser	1064nm laser safe for darker skin hair removal and vascular treatment	Dark skin-safe laser	Industry Standard	Treatment
Neurophroline	Wild indigo extract reducing cortisol for stressed skin and inflammation management	Anti-stress botanical	Industry Standard	Active Ingredient
Niacinamide (Vitamin B3)	Water-soluble vitamin improving barrier function, regulating sebum, reducing hyperpigmentation, and minimizing pores	Multi-functional skin health ingredient	Industry Standard	Active Ingredient

Niacinamide Serum	Vitamin B3 serum for pore refinement, sebum regulation, and barrier strengthening	Targets enlarged pores and oiliness	Dr. Barbara Sturm	Serum
NMF Sodium PCA	Natural Moisturizing Factor component (sodium pyrrolidone carboxylic acid) for optimal hydration	Skin-identical humectant	Natura Bissé	Active Ingredient
Occlusive	Barrier-forming ingredient (petrolatum, lanolin, beeswax) preventing water loss	Sealing ingredient type	Industry Standard	Ingredient Category
Octamioyl®	Peptide complex for muscle relaxation and wrinkle smoothing	Phase 1 of Zero Gravity Lift	Natura Bissé	Active Ingredient
Oligo-Collagen Complex	Low molecular weight collagen for enhanced penetration and efficacy	Featured in Diamond Experience products	Natura Bissé	Active Complex
Omorovicza™ Advanced Skin Renewal	Patented Healing Concentrate™, HA, niacinamide, amino acids, retinol comprehensive booster	Targets multiple aging concerns	HydraFacial	Treatment Booster
Oxygen Facial	Pressurized oxygen (95-98% pure) infused with serums for instant plumping and hydration boost	Celebrity favorite for red carpet prep	Industry Standard	Treatment Technique
PA Rating	Asian sunscreen rating for UVA protection: PA+ (some), PA++ (moderate), PA+++ (high), PA++++ (extremely high)	UVA protection rating	Industry Standard	Measurement
Palmitoyl Pentapeptide-4 (Matrixyl)	Five amino acid peptide stimulating collagen I, III, IV and fibronectin production	Anti-aging peptide powerhouse	Industry Standard	Active Ingredient
Palmitoyl Tripeptide-1	Three amino acid peptide supporting skin repair and collagen synthesis	Wound healing and anti-aging peptide	Industry Standard	Active Ingredient
Panthenol (Pro-Vitamin B5)	Humectant converting to pantothenic acid; anti-inflammatory and wound-healing properties	Soothing hydrator	Industry Standard	Active Ingredient
Patch Test	Small application of product 24-48 hours pre-service testing for allergic reaction	Allergy screening	Industry Standard	Safety Protocol
Penetration Enhancer	Ingredient (propylene glycol, urea, ethanol) increasing active absorption	Delivery-boosting ingredient	Industry Standard	Ingredient Category
Petrissage	Kneading, rolling, squeezing massage strokes working deeper tissues	Deep tissue massage stroke	Industry Standard	Massage Technique
pH Adjustment	Formulation optimization for ingredient stability and skin compatibility (typically 4.5-7)	Formulation optimization	Industry Standard	Formulation Concept
Photoaging	Premature skin aging from UV exposure causing wrinkles, pigmentation, texture changes	Sun damage manifestation	Industry Standard	Skin Condition
Phototoxicity	UV-induced skin reaction from photosensitizing ingredient (citrus oils, certain medications)	Sun-related reaction	Industry Standard	Clinical Concept
Phytic Acid	Chelating acid from rice bran; gentle exfoliation plus antioxidant and brightening properties	Multi-functional gentle acid	Industry Standard	Active Ingredient
Phyto-Lift	Plant-based lifting complex for visible skin elevation	Phase 3 of Zero Gravity Lift	Natura Bissé	Active Complex
Phytosphingosine	Lipid precursor to ceramides with antimicrobial and anti-inflammatory properties	Ceramide precursor and skin soother	Industry Standard	Active Ingredient
Picosecond Laser	Ultra-short pulse laser (trillionths of second) for tattoo removal and pigment shattering	Advanced laser technology	Industry Standard	Treatment
Plasma Pen (Fibroblasting)	Ionized gas creating plasma flash for immediate skin contraction and long-term tightening	Non-surgical blepharoplasty alternative	Industry Standard	Treatment
Polyhydroxy Acids (PHA)	Next-generation acids (gluconolactone, lactobionic acid) with larger molecules for gentler exfoliation plus humectant properties	Ideal for sensitive, rosacea-prone skin	Industry Standard	Active Ingredient
Prenatal Massage	Modified side-lying Swedish massage with pregnancy-safe positioning and techniques for expectant mothers	Specialized pregnancy massage	Industry Standard	Massage Modality
Preservative System	Antimicrobial ingredients (phenoxyethanol, parabens, benzyl alcohol) preventing contamination	Product safety component	Industry Standard	Formulation Component
Prickly Pear Extract	Opuntia ficus-indica extract for hydration and anti-inflammatory benefits	Featured in sun protection products	Dr. Barbara Sturm	Active Ingredient
Proteoglycan-Derma Complex	Combination of proteoglycans and dermal actives for firmness and structure support	Key ingredient in Essential Shock Intense	Natura Bissé	Active Complex
Pure Glacier Water	Pristine glacial water from unpolluted sources providing mineral-rich hydration base	Featured in body care formulations	Dr. Barbara Sturm	Base Ingredient
Purge	Temporary breakout (2-8 weeks) when introducing cell-turnover actives (retinoids, acids)	Adjustment period	Industry Standard	Treatment Response
Purslane Extract	Dr. Sturm's signature anti-inflammatory botanical powerhouse calming irritation and defending against free radicals	Featured in almost every Dr. Sturm formula	Dr. Barbara Sturm	Active Ingredient
Pyruvic Acid	Alpha-keto acid for deep exfoliation and collagen stimulation	Featured in Radiance Lifting Peel	Natura Bissé	Active Ingredient
Q-Switch Laser	Nanosecond pulse laser for tattoo removal and melasma treatment	Pigment-targeting laser	Industry Standard	Treatment

Radiofrequency Facial	Controlled heating of dermis to 40-45°C stimulating collagen and elastin production without surface damage	Non-invasive skin tightening technology	Industry Standard	Technology
Reflexology	Therapeutic foot massage working reflex points corresponding to organs and body systems	Zone therapy through feet	Industry Standard	Massage Modality
Resting Muscle Tone	Natural tension maintained by facial muscles at rest; improved by EMFACE treatments	30% average increase creates lifting effect	BTL	Clinical Outcome
Resveratrol	Polyphenol from grapes with potent antioxidant and anti-inflammatory properties	Longevity-associated antioxidant	Industry Standard	Active Ingredient
Retinaldehyde (Retinal)	Vitamin A derivative requiring one-step conversion to retinoic acid; more potent than retinol with less irritation	Next-generation retinoid	Industry Standard	Active Ingredient
Retinol	Vitamin A derivative requiring two-step conversion to retinoic acid; stimulates cellular turnover and collagen synthesis	Gold standard anti-aging ingredient	Industry Standard	Active Ingredient
Risorius	Lateral smile-extending facial muscle stimulated for improved symmetry	Contributes to expression enhancement	BTL	Anatomy
Rosacea	Chronic inflammatory condition causing facial redness, visible blood vessels, papules/pustules, and flushing	Requires gentle, anti-inflammatory approach	Industry Standard	Skin Condition
Salicylic Acid	Beta hydroxy acid (BHA) from willow bark; lipid-soluble for pore penetration and oil dissolution	Gold standard for oily, acne-prone skin	Industry Standard	Active Ingredient
Scarlet RF Microneedling	Fractional radiofrequency delivered through microneedles for enhanced collagen remodeling	Combined technology treatment	Industry Standard	Treatment
Sculpting Massage	Advanced contouring massage for facial definition and tissue lifting	90-minute extended protocol exclusive	Seed to Skin	Massage Technique
Sebaceous Gland	Oil-producing gland attached to hair follicle secreting sebum for skin lubrication	Oil production structure	Industry Standard	Anatomy/Physiology
Sebaceous Hyperplasia	Benign enlarged oil glands appearing as small yellow bumps on face	Cosmetic concern often mistaken for milia	Industry Standard	Skin Condition
Seborrheic Dermatitis	Inflammatory condition causing flaky, scaly patches primarily on scalp, face (eyebrows, sides of nose)	Requires specialized gentle treatment	Industry Standard	Skin Condition
Sensitization	Allergic reaction development after repeated exposure to ingredient (fragrance, preservative)	Adverse reaction type	Industry Standard	Clinical Concept
Sensorphine	Neuropeptide providing skin comfort and reducing sensitivity perception	Featured in Diamond line products	Natura Bissé	Active Ingredient
Seven Skin Method	K-beauty technique applying toner 7 times in thin layers for intensive hydration	Layered hydration method	Industry Standard	Treatment Technique
Shiatsu	Japanese finger-pressure technique working meridian points to balance qi (energy flow) through acupressure	Traditional Eastern bodywork	Industry Standard	Massage Modality
Shikimic Acid	Plant-derived acid from star anise for gentle exfoliation and brightening	Featured in Radiance Lifting Peel	Natura Bissé	Active Ingredient
Skin Cycling	Structured routine rotating actives (retinoid night 1, exfoliant night 2, recovery nights 3-4)	Strategic product rotation	Industry Standard	Treatment Philosophy
Skin Fasting	Intentional reduction/elimination of products allowing skin to reset and regulate natural functions	Minimalist skincare approach	Industry Standard	Treatment Philosophy
Skin Longevity	Optimizing cellular processes for skin that looks, acts, and feels firmer, younger, healthier for longer	Central goal of Super Anti-Aging collection	Dr. Barbara Sturm	Scientific Concept
Skin Microbiome	Ecosystem of bacteria, fungi, viruses living on skin surface influencing immunity and barrier function	Skin's bacterial ecosystem	Industry Standard	Microbiology
Skin pH	Measurement of skin surface acidity/alkalinity; healthy range 4.5-5.5 for optimal barrier and microbiome	Acidity measurement	Industry Standard	Measurement
Skin-Identical Ceramides	Ceramides (NP, AP, EOP) matching skin's natural ceramide profile for barrier repair and hydration	Phase 2 of Super Anti-Aging Dual Serum	Dr. Barbara Sturm	Active Ingredient
Skullcap	Antioxidant botanical supporting telomerase activation for cellular longevity and delayed senescence	Key ingredient in Super Anti-Aging Dual Serum	Dr. Barbara Sturm	Active Ingredient
Slugging	K-beauty technique applying occlusive (petroleum jelly, Aquaphor) as final step sealing in hydration overnight	Occlusive hydration technique	Industry Standard	Treatment Technique
SNAP-8	Octapeptide extension of Argireline for enhanced anti-wrinkle efficacy	Advanced neuropeptide	Industry Standard	Active Ingredient
SOAP Notes	Subjective, Objective, Assessment, Plan charting system for treatment documentation	Medical documentation format	Industry Standard	Documentation System
Sodium Hyaluronate	Salt form of hyaluronic acid; smaller molecular size for deeper penetration	Deeply hydrating humectant	Industry Standard	Active Ingredient
Sodium PCA	NMF (Natural Moisturizing Factor) component; highly effective humectant occurring naturally in skin	Skin-identical hydrator	Industry Standard	Active Ingredient

SPF (Sun Protection Factor)	Measurement of UVB protection; SPF 30 blocks 97%, SPF 50 blocks 98% of UVB rays	Sunscreen efficacy rating	Industry Standard	Measurement
Sports Massage	Targeted massage combining Swedish, deep tissue, and stretching for athletic performance and recovery	Performance-focused bodywork	Industry Standard	Massage Modality
Squalane	Hydrogenated squalene (from olives/sugarcane); biomimetic lipid for barrier support without oxidation	Stable barrier-supporting oil	Industry Standard	Active Ingredient
Stem Cell Extracts	Plant or mammalian-derived stem cell cultures providing growth factors and protective compounds	Advanced biotech ingredient	Industry Standard	Active Ingredient
Stratum Corneum	Outermost skin layer consisting of dead keratinocytes (corneocytes) and lipid lamellae forming barrier	Skin barrier primary component	Industry Standard	Anatomy/Physiology
SturmGlow™ Collection	3-step essential skincare routine (Cleanser, Hyaluronic Serum, Face Cream) for fresh, hydrated, firm complexion	Daily routine working for every skin type	Dr. Barbara Sturm	Product Line
Sun Cream Body SPF 30	Broad-spectrum body sunscreen protecting against UVA/UVB/infrared/HEV light with lingonberry and purslane	360° sun protection for body	Dr. Barbara Sturm	Sun Protection
Sun Drops SPF 30	Medium-protection sunscreen for daily use with anti-aging benefits	Alternative to SPF 50 for less intense exposure	Dr. Barbara Sturm	Sun Protection
Sun Drops SPF 50	Lightweight facial sunscreen with broad-spectrum protection and antioxidants	Daily sun protection without heaviness	Dr. Barbara Sturm	Sun Protection
Super Anti-Aging Cleansing Cream	Gentle yet effective cleanser removing makeup and impurities while supporting barrier function	Step 1 in Super Anti-Aging routine	Dr. Barbara Sturm	Cleanser
Super Anti-Aging Collection	Comprehensive anti-aging line with high-concentration biotechnologically-derived ingredients for firming, smoothing, and radiance	360° anti-aging power tools	Dr. Barbara Sturm	Product Line
Super Anti-Aging Dual Serum	Two-phase serum: Phase 1 HA-based with skullcap; Phase 2 ceramide-peptide complex for age reversal and longevity	Most advanced anti-aging product (£340/€380/\$430)	Dr. Barbara Sturm	Serum
Super Anti-Aging Eye Cream	Specialized eye treatment addressing periorbital aging signs with peptides and botanicals	Targeted eye area anti-aging	Dr. Barbara Sturm	Eye Treatment
Super Anti-Aging Face Cream	Rich moisturizer with biomimetic peptides and ceramides for firmness and wrinkle reduction	Final moisture step in anti-aging routine	Dr. Barbara Sturm	Moisturizer
Super Anti-Aging Night Cream	Overnight intensive treatment supporting skin repair and regeneration during sleep	Nighttime anti-aging step	Dr. Barbara Sturm	Night Treatment
Super Anti-Aging Serum	Intensive serum with purslane, skullcap, and peptides for visible age reversal and skin longevity	Core anti-aging serum	Dr. Barbara Sturm	Serum
Supramaximal Contraction	Muscle contraction beyond voluntary capability promoting protein synthesis and myofibril renewal	Results in improved resting tone and lift	BTL	Physiological Effect
Swedish Massage	Five classic strokes (effleurage, petrissage, tapotement, friction, vibration) for relaxation and circulation	Foundation massage technique	Industry Standard	Massage Modality
Syn-Ake	Synthetic snake venom peptide (dipeptide diaminobutyroyl benzylamide diacetate) for wrinkle reduction	Botox-like peptide	Industry Standard	Active Ingredient
Synchronized RF	Radiofrequency energy synchronized with HIFES for skin remodeling, texture improvement, and collagen/elastin increase (37% wrinkle reduction)	Thermal component of EMFACE treatment	BTL	Technology
Tapotement	Rhythmic tapping, cupping, hacking massage movements stimulating circulation	Percussion massage stroke	Industry Standard	Massage Technique
Tara Extract	Caesalpinia spinosa gum for film-forming and protective benefits	Featured in sun protection formulations	Dr. Barbara Sturm	Active Ingredient
Tazarotene	Third-generation synthetic retinoid most effective for psoriasis, acne, and photodamage	Prescription-only; most potent retinoid	Industry Standard	Active Ingredient
Telomerase Activation	Process of supporting telomere health for cellular longevity and delayed aging	Mechanism behind Skullcap's anti-aging benefits	Dr. Barbara Sturm	Scientific Concept
Thai Massage	Ancient practice combining acupressure, assisted yoga stretches, and energy line work on floor mat	Dynamic stretching bodywork	Industry Standard	Massage Modality
The Alche'Mist	Hydrating facial mist for moisture restoration and product preparation	Part of hydrating complex in most protocols	Seed to Skin	Hydrating Mist
The Bespoke Facial	60-90 minute customized facial with zone-specific mask analysis and personalized product selection	Tailored multi-mask approach	Seed to Skin	Facial Protocol
The Biom'Sphere	Anti-inflammatory serum with microbiome support for reactive skin	Alternative to Alche'Mist for sensitive conditions	Seed to Skin	Serum
The Black Magic	Detoxifying charcoal exfoliating mask with diatomaceous earth applied with mask brushes	15-minute treatment with scalp massage in exfoliating rituals	Seed to Skin	Mask/Exfoliant
The Clarity Cleanse	Gentle enzymatic exfoliating cleanser for texture refinement	Bespoke protocol cleanser option	Seed to Skin	Exfoliating Cleanser
The Cure	Rich moisturizer with barrier-repair complex for intensive hydration	Selected for dry or mature skin needs	Seed to Skin	Moisturizer

The Cure All-In-One Cleanser	Makeup remover/cleansing cream with green tea extract, dermo-compatible oils, chelating agents	Gentle yet thorough cleansing	Natura Bissé	Cleanser
The Cure for Men	Men's moisturizer addressing male skin characteristics (thicker dermis, higher sebum)	Customized for male guest protocols	Seed to Skin	Moisturizer
The Cure Hydro-Therapy Concentrate	Hydrating/repairing treatment with carob extract, sensorphine, NMF sodium PCA, niacinamide, shea butter, vitamin E, aloe vera, panthenol, arginine	Intensive hydration concentrate	Natura Bissé	Treatment
The Devotion Vetiver/Linden Flower	Aromatherapeutic body oil with Vetiver and Linden Flower for hand/arm massage	Creates sensory experience during mask processing	Seed to Skin	Body Oil
The Dew Mist	Activation mist for Golden Dew mask and skin refreshment throughout treatment	Spritzed every 5 minutes for mask efficacy	Seed to Skin	Hydrating Mist
The Divine Cleanse	Dual-purpose cleansing oil for deep cleansing massage and myofascial manipulation	Primary cleanser and massage medium across protocols	Seed to Skin	Cleanser
The Express Glow Facial	30-minute express treatment: Divine Cleanse myofascial, hydrating complex, Jade Roller/CryoGlobe	Quick results for time-constrained guests	Seed to Skin	Facial Protocol
The Eye Rescue Light Time	Eye treatment with peptides applied via Eye Wands for lymphatic stimulation	4-6 minute eye ritual with specialized massage	Seed to Skin	Eye Treatment
The Fermen'Tonic	Multi-functional fermented tonic with probiotics for post-exfoliation pH balancing	Applied with cotton pads after mask removal	Seed to Skin	Toner
The Flower Sphere Bliss	Aromatherapy sphere using essential oil inhalation for opening rituals to ground and center guests	Creates sensory journey beginning in all Seed to Skin facials	Seed to Skin	Aromatherapy
The Flower Sphere Cocoon	Closing aromatherapy sphere completing sensory journey	Paired with bear walking in closing ritual	Seed to Skin	Aromatherapy
The Golden Dew	Hydrating gel mask requiring Dew Mist reactivation every 5 minutes	Used in zone-specific mask layering treatments	Seed to Skin	Mask
The Good C Vitamin C Serum	Three vitamin C derivatives (5% total) + zinc for brightening and antioxidant protection without irritation	Stable vitamin C formulation	Dr. Barbara Sturm	Serum
The Light Source	Lightweight daily moisturizer with antioxidants for all skin types	Chosen for normal to combination skin	Seed to Skin	Moisturizer
The Manuka-Nutri Mask	Manuka honey enriched mask for deep nourishment and repair	Mixed 2:2 with The Peace in Purifying facial	Seed to Skin	Mask
The Midnight Miracle	Nourishing facial oil blend for overnight regeneration and CryoGlobe massage	Final nourishment step in treatment sequences	Seed to Skin	Facial Oil
The Peace	Calming mask with botanical soothers for sensitive/reactive skin	Zone-specific application or full-face treatment	Seed to Skin	Calming Mask
The Purifying Facial	60-90 minute lymphatic-focused facial with Jade Rollers and detoxifying masks	For congested, dull skin	Seed to Skin	Facial Protocol
The Radiance	Brightening exfoliant with fruit acids for dull, uneven skin	Selected for hyperpigmentation concerns	Seed to Skin	Exfoliant
The Reverse Signature Facial	90-minute comprehensive facial: double cleanse, Black Magic, myofascial massage, Active Delivery Mantle, CryoGlobe therapy	Signature Seed to Skin treatment	Seed to Skin	Facial Protocol
Thermage	Monopolar radiofrequency delivering bulk heating to deep dermis for collagen contraction	Single-session skin tightening	Industry Standard	Treatment
Thread Lift (PDO Threads)	Absorbable sutures inserted subdermally for mechanical lifting and collagen stimulation	Minimally invasive lifting procedure	Industry Standard	Treatment
Tight Junctions	Sealing junctions preventing passage of molecules between cells; critical for barrier	Barrier seal structure	Industry Standard	Cell Biology
Time-Release Technology	Formulation approach gradually releasing actives over extended period reducing irritation	Sustained release system	Industry Standard	Formulation Technology
Tranexamic Acid	Amino acid derivative inhibiting melanin production for hyperpigmentation treatment	Featured in Murad® Vita-C booster	HydraFacial	Active Ingredient
Tranexyl Spot Corrector	Tranexamic acid derivative for targeted hyperpigmentation treatment	Featured in Diamond Luminous Perfecting Serum	Natura Bissé	Active Ingredient
Transepidermal Water Loss (TEWL)	Measurement of water evaporation from skin indicating barrier function integrity	Objective hydration assessment	Industry Standard	Assessment Metric
Tretinoin (Retin-A)	Prescription retinoic acid; most potent form directly binding to receptors without conversion	Prescription-only; gold standard for acne and aging	Industry Standard	Active Ingredient
Tri-Hex™ Technology	Patented peptide technology supporting skin's natural ability to produce collagen and elastin	Exclusive to Alastin™ booster	HydraFacial	Active Ingredient
Trigger Point Therapy	Sustained pressure on hyperirritable spots in muscle (trigger points) to release referred pain patterns	Pain management technique	Industry Standard	Massage Modality
Ultherapy	Focused ultrasound (HIFU) delivering thermal energy to SMAS layer for skin tightening	FDA-cleared non-invasive lifting	Industry Standard	Treatment

Ultrasonic Facial	High-frequency sound waves (20,000+ Hz) for deep cleansing, exfoliation, and enhanced product penetration	Non-invasive sonic skin treatment	Industry Standard	Technology
Urea	NMF component with humectant and keratolytic properties at varying concentrations (10-40%)	Dual hydration and exfoliation	Industry Standard	Active Ingredient
Ursolic Acid	Triterpene from plant sources stimulating collagen synthesis and improving skin elasticity	Featured in Diamond Experience Essence	Natura Bissé	Active Ingredient
Vampire Facial	Microneedling with autologous PRP (patient's own blood-derived growth factors)	Celebrity-popularized regenerative treatment	Industry Standard	Treatment
Vegan Skincare	Products free from animal-derived ingredients (honey, beeswax, lanolin, collagen)	Animal-free formulation	Industry Standard	Product Category
Vibration	Rapid shaking or trembling massage movements relaxing muscles	Stimulating massage stroke	Industry Standard	Massage Technique
Vichy Shower	Overhead shower system with multiple shower heads used during body treatments for rinsing and massage	Hydrotherapy equipment	Industry Standard	Body Treatment
VISIA Skin Analysis	Advanced imaging system capturing and analyzing UV damage, brown spots, red areas, pores, texture, wrinkles, porphyrins, and bacteria	Gold standard digital skin analysis	Industry Standard	Diagnostic Technology
Vitamin C (Ascorbic Acid)	Water-soluble antioxidant, tyrosinase inhibitor, and collagen cofactor; unstable, requires stabilization (pH <3.5)	Brightening and anti-aging powerhouse	Industry Standard	Active Ingredient
Vitamin C Cyclodextrins	Encapsulated vitamin C for enhanced stability and sustained release	Stabilization technology in Natura Bissé C+C line	Natura Bissé	Active Ingredient
Vitamin E (Tocopherol)	Lipid-soluble antioxidant protecting cell membranes from oxidative damage; synergistic with vitamin C	Barrier-supporting antioxidant	Industry Standard	Active Ingredient
Vortex-Fusion Technology	Patented HydraFacial delivery combining vacuum suction with serum infusion for simultaneous extraction and ingredient delivery	Core 3-in-1 exfoliation, extraction, hydration technology	HydraFacial	Technology
Waterless Beauty	Anhydrous formulations reducing water usage for sustainability and concentration	Sustainability trend	Industry Standard	Product Category
White Almond Extract	Prunus amygdalus extract for skin firming and elasticity	Featured in body care formulations	Dr. Barbara Sturm	Active Ingredient
Wood Therapy (Maderoterapia)	Colombian massage technique using wooden tools for lymphatic drainage and body sculpting	Natural body contouring	Industry Standard	Body Treatment
Wood's Lamp Analysis	Ultraviolet light examination revealing hidden pigmentation, bacteria, and skin conditions invisible to naked eye	Diagnostic tool for skin assessment	Industry Standard	Diagnostic Tool
ZO® Brightalive	Skin brightening complex, glycerin tone-evening booster	Addresses hyperpigmentation	HydraFacial	Treatment Booster
ZO® Rozatrol®	Hydrolyzed algin, lactose, milk proteins, rosa canina, ZO-RRS2® calming booster	Addresses redness and sensitivity	HydraFacial	Treatment Booster
Zygomaticus Major and Minor	Cheek muscles for smile/expression targeted by EMFACE for mid-face lift	Toning creates natural cheek elevation	BTL	Anatomy

Term	Definition
Acid-Free Primer	Non-etching primer creating chemical bond without damaging natural nail
Acrylic Nails	Liquid monomer and powder polymer system creating hard enhancement; requires filing for removal
Base Coat	Foundation layer protecting natural nail and ensuring polish adhesion
BIAB (Builder in a Bottle)	Soak-off hard gel system strengthening natural nails while allowing growth; flexibility without brittleness
Callus Remover	Keratolytic product (urea, salicylic acid) softening thick skin on feet for removal
Chrome Powder	Metallic pigment creating mirror finish when rubbed over gel top coat before curing
Cuticle Oil	Nourishing oil (jojoba, vitamin E, almond) for cuticle and nail bed hydration
Cuticle Pusher	Metal or wooden tool for gently pushing back cuticle from nail plate
Cuticle Remover	Alkaline product (potassium hydroxide) softening and loosening excess cuticle tissue
Dip Powder	Powder system applied with base/activator; long-lasting (3-4 weeks) without UV lamp
E-File (Electric File)	Rotary tool with various bits for precise cuticle work, product removal, and shaping
Foot Spa	Basin with jets and heating for foot soaking during pedicure services
French Manicure	Classic style with natural/pink base and white free edge; variations include reverse French, colored tips
Gel Polish	Soak-off gel requiring UV/LED curing; lasts 2-3 weeks without chipping when properly applied
Gel-X	Pre-shaped soft gel full-cover tips applied with gel adhesive for quick, customizable extensions
Hard Gel	Non-porous gel requiring filing for removal; used for extensions, overlays, and structure
Japanese Manicure (P-Shine)	Natural nail buffing system using paste and buffing pads for glossy shine without polish
Nail Art	Decorative techniques including hand-painting, stamping, 3D embellishments, chrome, foils, encapsulation
Nail Buffer	Multi-sided tool for smoothing nail plate and creating shine through progressive grits
Nail Clippers	Cutting tool for shortening natural nails before filing and shaping
Nail Dehydrator	Product removing oils and moisture from nail plate for optimal adhesion
Nail Extension	Artificial length addition using tips, forms, or sculpting techniques with gel or acrylic
Nail File	Abrasive tool (80-240 grit) for shaping and smoothing natural or artificial nails
Nail Forms	Disposable or reusable guides for sculpting extensions without tips
Nail Overlay	Enhancement applied over natural nail for strength without adding length
Nail Stamping	Transfer technique using etched metal plates and stamper for intricate designs
Nail Strengthener	Treatment product with calcium, protein, or keratin to fortify weak, brittle nails
Ombre Nails	Gradient color blend from light to dark or color-to-color using sponge or brush technique
Onycholysis	Separation of nail plate from nail bed; can indicate infection, trauma, or systemic condition

Onychomycosis	Fungal nail infection causing discoloration, thickening, and brittleness; contraindication for services
Paraffin Wax Treatment	Heated wax (125-130°F) dip for hands/feet providing deep moisturization and warmth
Paronychia	Bacterial/fungal infection of skin around nail causing redness, swelling, pain; contraindication for services
Press-On Nails	Adhesive-backed artificial nails for temporary wear (days to weeks) without professional application
Russian Manicure	Intensive dry cuticle work using electric file bits for immaculate, long-lasting prep
Top Coat	Final protective layer sealing polish and adding shine
UV/LED Lamp	Curing device emitting UV (365nm) or LED (395-405nm) light for gel polymerization

Term	Definition
Active Recovery	Low-intensity movement (walking, swimming, yoga) promoting circulation without muscular stress
Barre	Ballet-inspired workout combining isometric holds, small movements, and stretching at ballet barre
BMI (Body Mass Index)	Weight-to-height ratio calculation (kg/m^2); screening tool with limitations (doesn't account for composition)
Body Composition Analysis	Assessment of fat mass, lean mass, bone density, and water using BIA, DEXA, or skinfold calipers
Body Fat Percentage	Proportion of body weight from adipose tissue; ranges vary by gender and fitness level
Circuit Training	Series of exercises (6-10) performed consecutively with minimal rest between stations
Compound Exercises	Multi-joint movements engaging multiple muscle groups (squats, deadlifts, presses, rows)
Core Training	Exercises targeting deep abdominal and back muscles (transverse abdominis, multifidus, pelvic floor)
Deload Week	Planned recovery week with reduced training volume (40-60%) allowing supercompensation
Fitness Assessment	Comprehensive evaluation of cardiovascular fitness, strength, flexibility, and body composition
Flexibility Training	Static and dynamic stretching improving passive range of motion and tissue extensibility
Foam Rolling	Self-myofascial release using cylindrical foam roller to reduce muscle tightness and improve mobility
Functional Training	Exercises mimicking real-life movements engaging multiple muscle groups and planes of motion
Heart Rate Zones	Training intensity ranges based on maximum heart rate: Zone 1 (50-60%), Zone 2 (60-70%), Zone 3 (70-80%), Zone 4 (80-90%), Zone 5 (90-100%)
HIIT (High-Intensity Interval Training)	Exercise alternating short bursts (20-90 sec) of intense effort with recovery periods
Isolation Exercises	Single-joint movements targeting specific muscles (bicep curls, leg extensions, lateral raises)
Kettlebell Training	Cast-iron weight with handle for ballistic and grinding movements developing power and strength
Maximal Strength	Maximum force muscle/group can generate in single effort (1RM test)
Metabolic Conditioning (MetCon)	High-intensity exercises designed to improve energy system efficiency and burn maximum calories
Mobility Training	Exercises improving active range of motion through controlled joint movement and flexibility
Muscle Endurance	Ability to perform repeated contractions against resistance without fatigue
Muscle Hypertrophy	Increase in muscle fiber size through mechanical tension, metabolic stress, and muscle damage
Mywellness	Technogym's cloud-based platform tracking workouts, progress, and goals across devices
Nutritional Counseling	Personalized dietary guidance for health, performance, or body composition goals

Periodization	Systematic training program variation across cycles (macrocycle, mesocycle, microcycle) to optimize adaptation
Personal Training	One-on-one customized fitness instruction with certified professional
Pilates	Low-impact exercise focusing on core strength, flexibility, and body awareness through controlled movements
Plyometrics	Explosive jumping/bounding exercises utilizing stretch-shortening cycle for power development
Progressive Overload	Systematic increase in training stress (weight, reps, sets, frequency) to drive adaptation
Proprioception	Body's awareness of position and movement in space; trainable through balance and stability work
RPE (Rate of Perceived Exertion)	Subjective intensity scale (1-10 or 6-20) for monitoring workout difficulty
SKILLMILL	Non-motorized curved treadmill for HIIT, sled pushing/pulling, and functional training
SKILLROW	Water-resistance rowing machine with dynamic resistance and training programs
Spin/Cycling	Indoor stationary bike workout with varied resistance and cadence for cardiovascular endurance
Technogym	Premium Italian fitness equipment manufacturer providing Mywellness platform, SKILLMILL, SKILLROW
TRX (Suspension Training)	Bodyweight exercises using adjustable straps challenging stability and engaging core
VO2 Max	Maximum rate of oxygen consumption during exercise; gold standard fitness measurement (ml/kg/min)
Yoga	Mind-body practice combining asanas (postures), pranayama (breath control), and meditation

Definition
Soothing post-shave moisturizer with anti-inflammatory ingredients (aloe, witch hazel, allantoin)
Potassium alum stone for post-shave astringent, antiseptic, and styptic properties
Hydraulic reclining chair with headrest designed for barbering services
Soft-bristle brush (usually horsehair/synthetic) for removing hair clippings from neck and face
Leave-in conditioner with beeswax for styling hold plus oils for conditioning
Conditioning oil blend (jojoba, argan, sweet almond) softening beard and nourishing skin underneath
Shaping and maintaining beard using clippers, scissors, and razor for defined lines
Technique using clippers above comb for graduated blending and length control
Trimming, shaping, and waxing/threading of eyebrows for men
Graduated hair length from short (often skin-level) at bottom to longer at top
Semi-permanent color service reducing gray appearance by blending (not covering) for natural look
Matte-finish styling product with strong hold and natural look
Electric tool with guards (sizes 0-8) for precise length cutting
Water-based styling product with firm hold and wet-look shine
Oil or wax-based styling product providing shine and strong/medium hold
Professional shears (5.5-7 inches) for precision cutting and texturizing
Alcohol or water-based liquid for scalp health, light hold, and shine
Pliable styling product providing hold with semi-matte to natural finish
Equipment heating shaving cream/soap to ideal temperature for application
Heated towels (140-160°F) applied to face opening pores, softening beard, and relaxing muscles
Crisp definition of hairline, beard line, and sideburns using trimmers or razor
Beeswax-based product for shaping and holding mustache in desired style
Brush for removing loose hairs after haircut or shave
Grooming service removing visible nose and ear hair using trimmers or scissors
Hair swept upward from face and worn high over forehead (2-6 inches)
Lubricating oil (jojoba, argan, castor) applied before lather for glide and skin protection
Similar to pompadour but with less volume and height; textured top swept up and back
Skin fade achieved using straight razor for ultra-smooth finish
Professional shave using double-edge safety razor with replaceable blades
Therapeutic massage of scalp stimulating circulation and promoting relaxation
Therapeutic treatment addressing dandruff, dryness, or oiliness using specialized products
Technique using scissors above comb for precise graduated cutting
Straight razor accepting disposable blades; no stropping/honing required
Whipped cream/foam from soap or cream providing cushion and glide for razor
Traditional open blade requiring stropping and honing for maintenance

Professional shave using traditional straight razor (cut-throat razor) requiring certification
Gradual length decrease but not as dramatic as fade; cleaner, more conservative
Creating movement and removing bulk using point cutting, slicing, or notching techniques
Scissors with teeth removing bulk while maintaining length for texture
Cabinet maintaining hot towels at optimal temperature for service
Classic wet shave service using hot towels, pre-shave oil, lather, straight/safety razor, and cold towel finish
World's oldest barbershop brand (est. 1805) offering traditional grooming services and products
Short/shaved sides and back with longer disconnected top
